**THE DEVELOPMENT OF A VIBRATING PRESSES FOR MOULDING
OF ASPHALT-CONCRETE DESIGNS**

The design and principle of operation of vibrating the press for forming the control of asphalt samples. Given the peculiarities of vibroimpulse impact on formed product and the equation for the description of the elastic-visco-plastic flow sealing asphalt environment. Brief technical characteristics of the vibration of the press.

Keywords: *vibration press, asphalt mix, sample of asphalt concrete.*
